Published as a Supplement to the July, 1942 Issue of METALS AND ALLOYS

East Engin.
Library

A Complete Index to

METALS and ALLOYS

Volume 15

January - June 1942, inclusive

This index, the first of its kind published by METALS AND ALLOYS, covers the complete contents of the first six issues of the magazine in 1942. In previous years we have published in the last issue of each volume an index of just the feature-section articles and editorials in that volume, and have published and sold a separate annual index of the "abstracts" or "digests."

The present comprehensive index, prepared by Edward M. Allen, covers not only all material in the feature section, digests and editorials, but the following departments as well: News, Shop Notes, Book Reviews, Trends, The Production Front, Letters to the Editor, Society-meeting Previews and Convention Reports.

The department in which the item appeared is indicated in each entry by words such as "(digest)", "(news)", etc. following the subject or author. Where a department is not thus indicated, the indexed item was a feature article. The reference numeration indicates, first, the page number, which is continuous throughout the volume; second the volume number, which is constant for the present index; and third, the issue number showing the month in which the item appeared: Thus, the reference number 737:15-5 indicates that the indexed article is to be found on page 737 of volume 15 (Jan.-June 1942) in the May issue.

—The Editors.

SUBJECT and TITLE INDEX

Age-hardening, see Heat treatment
Aircraft:
- Aircraft and engines, Titterton, George F.—65:15-1
- Aircraft engines (trends)—902:15-5
- Aircraft materials and processes, 2nd ed., Titterton, G. F. (book review)—1082:15-6
- Airplanes and guns, ships (editorial)—737:15-5
- Aluminum alloys, electric salt bath treatment of, Santore, C.—254:15-2
- Aluminum goes to war (digest)—1058:15-6
- Bearings for Aircraft (trends)—360:15-2
- Broaching vs milling in aircraft (news)—992:15-6
- Cylinder barrels centrifugally cast, airplane (trends)—714:15-4; 904:15-5
- Cylinder heads, forged, for airplanes (news) 991:15-6
- Cylinder heads, mass production of airplane (news)—270:15-2
- Drop forging, aircraft parts (digest)—1036:15-6
- Exhaust manifolds, stainless, fabricating—980:15-6
- Heat treating, aircraft parts (news)—453:15-3
- Inspection manual, aircraft magnaflux, Doane, F. B., and Thomas, W. E. (book review)—532:15-3
- Metallizing aircraft engine parts (digest)—674:15-4
- Metallizing in aircraft maintenance (digest)—304:15-2
- Military airplanes, more and more (trends)—202:15-1
- Oxygen cylinders, aircraft, making—981:15-6
- Propellers, airplane (trends)—902:15-5
- Propeller blades, hollow steel (digest)—665:15-4
- Spot welds, aircraft, radiography of (digest)—892:15-5
- Stainless steel wire in aircraft (digest)—170:15-1
- Steel and wood aircraft (digest)—1048:15-6
- Welding, aircraft (digest)—298:15-2
- Welding torch for airplane construction (news)—110:15-1

Allocation and priorities (production front)—909:15-6
Alloy-addition weight table (shop notes)—834:15-5
Alloy cast irons (digest)—326:15-2
Alloying element, hydrogen as an (digest)—174:15-1
Aluminum:
- Aircraft alloys, electric salt bath treatment of, Santore, C.—254:15-2
- Alloy armor plate (digest)—330:15-2
- Alloy forgings (trends)—200:15-1
- Alloys, heat treating (digest)—162:15-1
- Anodic coatings on, Hill, H. N., and Mason, R. B.—972:15-6
- Castings, plaster molds for (digest)—1018:15-6
- Castings, porosity in (digest)—840:15-5
- Goes to war (digest)—1058:15-6
- Melting furnace for (news)—115:15-1
- Parts, cleaner for (news)—628:15-4
- Patterns of (trends)—200:15-1
- Pistons, tinning (digest)—1042:15-6
- Portable welding gun for (news)—112:15-1
- Rolling (digest)—1014:15-6
- Scrap, reclaiming (digest)—473:15-3
- Tools for machining, The Metal Industry (shop notes)—636:15-4

American foundrymen's association:
- Annual conclave of, preview—607:15-4
- Convention and foundry show (news)—802:15-5

American institute of mining and metallurgical engineers, report of annual meeting—429:15-3
American society of mechanical engineers, annual meeting of (news)—116:15-1
American year book, Schuyler, W. M., and Hart, A. B., eds. (book review)—1083:15-6
Annealing, see Heat treatment
Arc welding, see Welding
Assembling, precision, colloidal graphite for (news)—826:15-5
Automotive products:
- Automotive bearings (trends)—360:15-2
- Automotive products, Boegehold, A. L.—68:15-1
- Auto radiators and heaters of steel (trends)—200:15-1
- Brake drums—I, Smalley, Oliver—256:15-2
- Brake drums—II, Smalley, Oliver—405:15-3
- Brake drums—III, Smalley, Oliver—595:15-4
- Cars and trucks, light metals in (digest)—516:15-3
- Cast iron piston, bearings and the (trends)—360:15-2
- Oil corrosion-resisting (news)—633:15-4
- Piston, cast iron, bearings and the (trends)—360:15-2
- Pistons, aluminum, tinning (digest)—1042:15-6
- Tractor forgings, making, Chase, Herbert—956:15-6
- Truck bodies, welded (trends)—200:15-1
- Trucks, light metals in cars and (digest)—516:15-3

Awards, AFA (news)—802:15-5
Axis, mineral supplies of (digest)—1014:15-6
Battelle memorial institute, books, publications and patents of (book review)—352:15-2
Bearings:
- Aircraft (trends)—360:15-2
- Automotive (trends)—360:15-2
- Cast iron piston, the, and (trends)—360:15-2
- Heavy-duty (digest)—684:15-4
- Iron, porous (news)—273:15-2
- Rolling mill (digest)—286:15-2
- Sleeve (digest)—186:15-1
- Surface smoothness and (digest)—322:15-2

Beryllium, malleable, Clausen, G. E., and Skehan, J. W.—599:15-4
Bessemer converters, see Melting, refining, and pouring
Blast cleaning, see Cleaning
Blast furnace practice:
- Air conditioned blast furnaces (digest)—134:15-1; (trends)—358:15-2; 902:15-5
- Blast furnace, inside the (digest)—842:15-5
- Blast furnaces, larger (trends)—540:15-3
- Blast furnaces, larger (trends)—1092:15-6
- Blast furnaces, more (trends)—202:15-1
- Blast furnaces, parts of old (trends)—902:15-5
- Blast furnace (in 1941) the, McKee, Arthur G.—40:15-1
- Blast furnace conference, Joseph, T. L.—791:15-5
- Blast-furnace operation, coke properties and (digest)—468:15-3
- Blast furnace production, boosting (digest)—642:15-4
- Coke capacity, our (trends)—540:15-3
- Coke properties and blast-furnace operation (digest)—468:15-3

Book reviews:
- Aircraft materials and processes, 2nd ed., Titterton, G. F.—1082:15-6
- American year book, Schuyler, W. M., and Hart, A. B., ed.—1083:15-6
- Books, publications and patents of the Battelle memorial institute, Batelle Memorial Institute—352:15-2
- Commercial market for pearlitic malleable cast iron, Boyes, Donald L.—352:15-2
- Diffusion in and through solids, Barrer, R. M.—352:15-2
- Fatigue of metals—some facts for the designing engineer, Nitralloy Corp.—706:15-4
- Handbook of welded steel plate construction, Buffalo Tank Corp.—1083:15-6
- Heat treating and inspection of metals, U.S. War Department—1083:15-6
- Industrial controlled atmosphere, Koebel, Norbert K.—1083:15-6
- Industrial plastics, 2nd ed., Simonds, Herbert R.—350:15-2
- Iron men and their dogs, Latrobe, Ferdinand C.—706:15-4
- Magnaflux aircraft inspection manual, Doane, F. B., and Thomas, W. E.—532:15-3
- Materials testing, Gilkey, Herbert J.; Murphy, Glenn; and Bergman, Elmer O.—350:15-2
- Mechanical engineers' handbook, Marks, Lionel S., ed.—706:15-4
- Metal processing, Boston, Orlan W.—1082:15-6
- Metal statistics, American Metal Market—1083:15-6
- Modern core practice and theories, Dietert, Harry W.—1082:15-6
- New encyclopedia of machine shop practice, Barnwell, George W., ed.—532:15-3
- Oil burner handbook, 2nd ed., Whelan, L. J.—1083:15-6

Photoelasticity, Frocht, Max M.—352:15-2
Photo-micrography, Allen, R. M.—706:15-4
Practical arc welding, Chaffee, W. J.—1082:15-6
Pressworking of metals, Hinman, C. W.—352:15-2
Principles of physical metallurgy, 2nd ed., Doan, Gilbert E., and Mahla, Elbert M.—532:15-3
Properties of carbon and alloy steel tubing for high temperature-high pressure service, Babcock-Wilcox Tube Co.—1083:15-6
Pyrometry, Wood, W. P., and Cork, J. M.—350:15-2
Refractories — the backbone of industry, Ramsay, John D.—1083:15-6
Spectrochemical abstracts, van Someren, E. H. S.—352:15-2
Technical handbook, Page, E. L.—1083:15-6
Twenty-sixth annual review of the silver market—538:15-3
Vocational and professional monographs—No. 33: Metallurgy, Williams, Robert S.—538:15-3

Brass:
Cartridge, hardness conversion data for (digest)—10/8:15-6
Cold-rolled, aging of (digest)—160:15-1
Foundry melting of (digest)—296:15-2
Iron-bearing, magnetism of (digest)—516:15-3
Powder metallurgy of (digest)—158:15-1
Production of (digest)—650:15-4
Tubing, drawing (digest)—318:15-2

Brazing, see Welding
Bronze, foundry melting of (digest)—296:15-2
Cadmium:
Output of (trends)—538:15-3
Plating (digest)—142:15-1
Carburizing, see Heat treatment
Castings, see Foundry practice, Metal-form comparisons
Cast iron, alloy (digest)—326:15-2
Cast steel armor plate (trends)—712:15-4
Ceilings, price, and prices (production front)—910:15-6
Centigrade-fahrenheit conversion, rapid, Tulauskas, L. (shop notes)—278:15-2
Cessation and limitation (production front)—909:15-6
Chrome-moly steel, weld-cracking of (digest)—1040:15-6
Chrome ores, low grade (trends)—360:15-2
Chrom-X, use of, in steel making, McDonald, John H.—249:15-2
Chromium, high purity, new method for producing (news)—632:15-4
Chromium plating (digest)—654:15-4
Cleaning (incl. Pickling):
Abrasive blast nozzles (news)—275:15-2
Aluminum and magnesium parts, cleaner for (news)—628:15-4
Cleaning machines, new source of (news)—826:15-5
Electro-cleaning, rectifiers and (digest)—862:15-5
Embrittlement in cleaning (digest)—312:15-2
Immersion heater speeds metal cleaning, Koch, L. A. (shop notes)—1003:15-6
Intricate cleaning, irregular work (news)—994:15-6
Magnesium, cleaning and finishing (digest)—860:15-5
Pickling concentrations, checking (news)—107:15-1
Pickling shell cases, annealing and (news)—996:15-6
Rectifiers and electro-cleaning (digest)—862:15-5
Small parts, cleaning and finishing, automatic machine for (news)—113:15-1
Solvent, new cleaning (news)—108:15-1
Stains, removing, on cartridge cases, Healy, J. J., Jr., (shop notes)—460:15-3

Coatings, see Finishing
Cobalt—its uses and substitutes (digest)—884:15-5
Cold-rolled brass, aging of (digest)—160:15-1
Collapsible tubes, new alloy for (trends)—904:15-5
Colloidal graphite for precision assembling (news)—826:15-5
Commercial market for pearlitic malleable cast iron, Boyes, Donald L. (book review)—352:15-2
Conservation:
Alloys in the open-hearth, Reagan, W. J.—741:15-5
Metals in railroad equipment (trends)—1094:15-6
Strategic materials (trends)—902:15-5
Through fin-tube heat exchangers (news)—814:15-5
Welding electrodes, Herrick, Clayton B. (shop notes)—459:15-3

Containers, Van Vleet, H. S.—76:15-1
Control, see Instrumentation and control
Conversion:
Case histories, some typical—768:15-5
War production—763:15-5
War production, sheet-metal fabricating—979:15-6

Copper:
Cable, repairing, Jones, R. T. (shop notes)—278:15-2
Copper alloys and, blackening (news)—820:15-5
In 1941 (trends)—360:15-2
In copper-bearing steel (trends)—1092:15-6
Plating process, alkaline (news)—992:15-6
Situation, the secondary (digest)—850:15-5
Strip, rolling and annealing of (digest)—476:15-3

Copper-bearing steel:
Copper in (trends)—1092:15-6
For heavy fabrication—I, Eberle, F.—588:15-4
For heavy fabrication—II, Eberle, F.—758:15-5

Correcting a press report, Derge, G. (letters)—594:15-4
Corrosion:
Bacterial, inside pipes (digest)—684:15-4
By superheated steam (digest)—878:15-5
Corrosion-resisting oil (news)—633:15-4
Iron, painted, corrosion test for (digest)—192:15-1
Mercury vapor equipment, steels for (digest)—683:15-4
Pipe, underwater, protection of (digest)—510:15-3
Pipe protection, underground (digest)—882:15-5
Pipes, bacterial corrosion inside (digest)—684:15-4

Production front, the, Knight, Harold A.—907:15-6
Properties of carbon and alloy steel tubing for high temperature-high pressure service, Babcock and Wilcox Tube Co. (book review)—1083:15-6
Pyrometry, Wood, W. P., and Cork, J. M. (book review)—350:15-2
Radiography, see Inspection
Railroad equipment:
Railroad equipment, conserving metals in (trends)—1094:15-6
Railroad rails, pressure-welding (digest)—154:15-1
Railroad scrap offerings (trends)—358:15-2
Rails, heat treatment of (digest)—1036:15-6
Reclamation, see Salvage and reclamation
Refining, see Melting, refining, and pouring
Refractories, see Heat treatment; Melting, refining, and pouring
Refractories — the backbone of industry, Ramsay, John D. (book review)—1083:15-6
Research, increase in (trends)—1092:15-6
Rolling:
Aging of cold-rolled brass (digest)—160:15-1
Ingot, rolling stainless sheets from (digest) —468:15-3
Rolling aluminum (digest)—1014:15-6
Rolling and annealing of copper strip (digest) —474:15-3
Rolling mill bearings (digest)—286:15-2
Russian technical literature, Crandal, Emma C. (letters)—594:15-4
Safety in steel industry (trends)—358:15-2
Safety in welding (trends)—1092:15-6
Salvage and reclamation:
Aluminum scrap, reclaiming (digest)—473: 15-3
Junk (production front)—910:15-6
Metals, conserving, in railroad equipment (trends)—1094:15-6
Reclaiming mill, metal (news)—106:15-1
Repairing copper cable, Jones, R. T. (shop notes)—278:15-2
Salvaging foundry waste (digest)—284:15-2
Salvaging worn parts (digest)—1038:15-6
Scrap, aluminum, reclaiming (digest)—473: 15-3
Scrap iron and steel (trends)—358:15-2
Scrap metals, imported (trends)—714:15-4
Selenium and tellurium become "useful" (news)—274:15-2
Shipbuilding:
Merchant marine plant, westinghouse dedicates new (news)—998:15-6
Ships, airplanes and guns (editorial)—737: 15-5
Ships, welding (digest)—314:15-2
Shop notes, metallurgical engineering—123:15-1; 277: 15-2; 459:15-3; 635:15-4; 833:15-5; 1003:15-6
Silver:
Gold and, in wartime, Shell, John S.—236: 15-2
In industry (editorial)—604:15-4
Low-tin solders containing, and bismuth, Turkus, S., and Smith, A. A., Jr.—412:15-3
New wartime uses for (digest)—884:15-5
Solder, lithium-bearing—962:15-6
Silver alloys:
Faster brazing with (shop notes)—1003:15-6
Heat-treated (trends)—714:15-4
Silver market, twenty-sixth annual review of the (book review)—538:15-3
Soldering automatically (news)—106:15-1
Solders:
For hot water lines (digest)—1064:15-6
High-lead, using, report by National Research Council (shop notes)—635:15-4
High tensile strength (news)—632:15-4
Hot water lines, solder for (digest)—1064:15-6
Low-tin, containing silver and bismuth, Turkus, S., and Smith, A. A., Jr.—412:15-3
Silver, lithium-bearing—962:15-6
Substitute, and their uses (digest)—868:15-5
South America, foundry activities in (news)—802:15-5
Sparks from aluminum-painted steel (digest)—158: 15-1
Specifications, new (trends)—904:15-5
Spectrochemical abstracts, van Someren, E. H. S. (book review)—352:15-2
Spectrography, see Inspection, Testing
Spot welding, see Welding
Spring clips, embrittlement of, Homer, C. E. (shop notes)—277:15-2
Springs, self-compensating, metals in (digest)—676: 15-4
Stainless steel:
Arc welding (digest)—1034:15-6
Electropolishing (digest)—148:15-1
18-8, nitrogen in (digest)—510:15-3
Exhaust manifolds, fabricating—980:15-6
Less this year (trends)—1092:15-6
Manganese in (trends)—358:15-2
Properties of (digest)—174:15-1
Treating, by a new process (news)—820:15-5
Stainless steel sheets, rolling from ingot (digest)—468:15-3
Stainless steel wire in aircraft (digest)—170:15-1
Stamping, see Forming
Standardization (trends)—202:15-1
Standardization, simplification and (production front)—909:15-6
Statistics, metal, American Metal Market (book review)—1083:15-6
Steel:
Aluminum-painted, sparks from (digest)—158:15-1
Auto radiators and heaters of (trends)—200:15-1
Boron deoxidizers for (digest)—292:15-2
Capacity, greater (trends)—540:15-3
Capacity, new pig iron and (trends)—714:15-4
Cartridge cases (trends)—360:15-2; 904:15-5
Cast, fluidity test for (digest)—348:15-2
Casting capacity (trends)—714:15-4
Castings (news)—828:15-5
Castings, heat treating (trends)—540:15-3
Castings, tearing of (digest)—842:15-5
Castings in 1941 (trends)—714:15-4
Chrome-moly, weld-cracking of (digest)—1040:15-6
Clad, welding (digest)—494:15-3
Converter (editorial)—955:15-6
Copper-bearing, copper in (trends)—1092:15-6
Copper-bearing, for heavy fabrication — I, Eberle, F.—588:15-4
Copper-bearing, for heavy fabrication — II, Eberle, F.—758:15-5
Die, distortion in treating (digest)—310:15-2
Electric (editorial)—235:15-2
Electric, production (trends)—1092:15-6
Electro-galvanized, corrosion resistance of (digest)—680:15-4
Finished, in 1941 (trends)—540:15-3
For mercury vapor equipment (digest)—683:15-4
Furnaces, dolomite bricks in (digest)—844: 15-5
Graphitic (digest)—512:15-3
Hardenability of, Parke, Robert M., and Herzig, Alvin J.—241:15-2
Hardenability testing standards (digest)—528:15-3
Hollow, propeller blades (digest)—665:15-4
Hot-quenching high-speed (digest)—864:15-5
Ingots and castings (trends)—358:15-2
In 1942 (trends)—1094:15-6
Liquid, pyrometry of (digest)—1074:15-6
Low-frequency furnaces for (digest)—132: 15-1
Machinability of cast iron and (digest)—858:15-5
Molybdenum high speed, more hints on heat treating (digest)—308:15-2
New yardstick for oil (trends)—1092:15-6
Operations, pooling (trends)—712:15-4
Parts, high- and low-carbon, sorting, Grace, R. H. (shop notes)—833:15-5
Parts, high- and low-carbon, sorting a mixture of, Kasper L. (shop notes)—459:15-3
Phosphate coatings on, Chase, Herbert—420:15-3
Plates, output (trends)—1094:15-6
Polishing, for plating-exposure tests (digest) —194:15-1
Scrap, shortage of (trends)—200:15-1
Scrap iron and (trends)—358:15-2
Short cuts to make more (trends)—714:15-4
Sink-head, saving (digest)—1016:15-6
Structural, painting (digest)—1034:15-6
Supply in 1942 (trends)—538:15-3
Titanium, structures of (digest)—1080:15-6
Tools, molybdenum high speed (digest)—154:15-1
Steel and wood aircraft (digest)—1048:15-6
Steel companies, earnings of (trends)—1092:15-6
Steel composition, weld hardening and, Edson, A.—966:15-6
Steel expansion program (trends)—1094:15-6
Steel from cupola-plus-converter (digest)—846:15-5
Steel in Brazil (trends)—202:15-1
Steel industry:
Draft deferments in (trends)—1092:15-6
Employees in (trends)—202:15-1
Problems (trends)—1094:15-6
Safety in (trends)—358:15-2
Steel tubing for high temperature-high pressure service, properties of carbon and alloy, Babcock-Wilcox Tube Co. (book review)—1083: 15-6
Steel welding wire, production (trends)—1094:15-6
Strategic materials, conservation of (trends)—902: 15-5
Strontium (trends)—902:15-5
Subcontractors! wanted:, Peters, Fred P.—773:15-5
Substitutes:
Alternate materials in product design (symposium)—67:15-1
Alternates and substitutes, reference table of—Sec. I: Household products, Clauser, H. L.—80:15-1
Alternates and substitutes, reference table of, Clauser, H. R.—403:15-3
Household and other civilian products, Clauser, Henry R.—77:15-1
Open-hearth, conservation of alloys in the, Reagan, W. J.—741:15-5
Pipe and fittings, valves, Kanter, J. J.—72:15-1
Sheet metal work, substitutes in (digest)—166:15-1
Simplification and standardization (production front)—909:15-6
Substitutes for cobalt (digest)—884:15-5
Substitutes for nickel and zinc coating (trends)—200:15-1
Substitutes in army mess equipment (trends) —540:15-3
Substitutes in sheet metal work (digest)—166:15-1
Substitute solders and their uses (digest)—868:15-5
Substitutions, progress in (production front) —908:15-6
Using high-lead solders, report by National Research Council (shop notes)—635:15-4

Supplies, mineral, of the axis (digest)—1014:15-6
Supply and demand (production front)—908:15-6
Surface cleanliness test, Unger, Chester E. (shop notes)—636:15-4
Surface finish testing, accessory for (news)—810:15-5
Surface hardening, see Heat treatment
Surfacehardness test, new (digest)—194:15-1
Surface smoothness, bearings and (digest)—322:15-2
Tank nets, plating (news)—113:15-1
